

Attention All BERA Body Building Club Members

Beginning January 2009, there will be monthly equipment clean-up on the second Tuesday of every month.

Don't panic.....what this involves is each and every one that uses the facility, wipe down one piece of equipment from top to bottom with the supplied Lysol/Water mix or Clorox wipes prior to beginning their scheduled work-out.

We are requesting that each volunteer use BBC supplied disposable latex gloves that are stored in the gray cabinet on the cardio level.

Non-participation in this clean-up by membership would result in one hour closure of the club during various lunch periods in order to complete the much needed task.

Note: These regular clean-ups will not only minimize the spread of germs in our facility, but it will also minimize excessive wear on all equipment and prevent untimely maintenance repairs and inconveniences to the user.

Thanks to All for your Continued Support,

BBC Executive Board
